Hello Neil and List,

For photo 1, have changed the caption to read as "HRO variants". It was the speaker and coil drawer which made me think it was an RAS. Since I had a some doubt, hence came the question.

For photo #2, I have indicated that it is reversed but left it in the document since its the only one which shows the Kana typewriters.

Thanks to everyone who offered their assistance.

Flea market leftovers...

Tragic, couldn't give away these items! Don't want to part them out or junque 'em, violates my sense of not wasting things.

1. Heath AG-10 sine/square wave gen, really 2 separate oscillators with common frequency-determining element, sine & squarewave outputs simultaneously available. 20 Hz - 1 MHz range, 13x8.5x7"D, 5 tubes, 2@ 6CL6, 6CB6, 12AX7, 6AW8. This is "semi-laboratory" quality according to Heath w/regards to sine wave distortion & square-wave-ness. Appearance pretty good. Has bad ss B+ diodes, probably bad B+ electrolytic cap blew it. Otherwise clean, wiring quality is ok. With W7FG manual.

2. Hewlett-Packard 400D ACVM, 10 mV - 300 V FS, flat to 4 MHz. Regulated PS. Uses lots of 6CB6's in amp chain. Of course, beautiful H-P construction. Pretty ok ext. appearance. Prob: Meter sometimes pins for a while (is NOT a meter problem but in the electronics). All tubes cked ok on 2 diff mutual transconductance TT's & some tube subs tried, nada; no obvious problems seen on phys inspection. With copy of ops/svc manual + some 400C schematics.

Any yours for cost of shipping & US$4 for a proper box & packing materials. I would ship these from the US, leaving for there tomorrow.

I had a lot of other stuff left over from flea mkt, vy low, single digit price$

or zero, can't believe what I couldn't give away. Hmmm.

Content-Transfer-Encoding: 7bit

If you're interested in the heritage and history of maritime radio, please draw a circle around 12 July on your calendars. That's the date of the 7th annual "Night of Nights" when KPH and several other stations will return to the air to commemorate the last day of commercial Morse in the US.

In addition to KPH and KSM we expect that several other coast stations as well as several ships will be on the air for this event. Several of the ships and coast stations will be operating on MF so those with interest in that hallowed portion of the spectrum should have several listening opportunities.

The details are still being worked out. An announcement with call signs, frequencies and time information will follow.

VY 73 to all,

RD

For sale:

TMC GPR-90 communications receiver. Good working
condition with the original cabinet. Can also rack
mount in a 19" rack.

With manual.

$1,000 plus shipping FOB Warner Robins, Georgia, USA.

I must warn you that this is a heavy receiver.

Personal inspections/pickup onsite welcome.

This is the version with the 100 KHz. xtal calibration
oscillator.

Input Z=300 and 75 ohms balanced/unbalanced.

Audio output: 4/8/16/600 ohms. 6V6 audio output with
negative feedback. This communications rcvr has better
audio than most and is esentially flat to 10 KHz.

Has "S" meter, BFO, xtal filter, phasing. The input RF
stage is grounded grid. Rather unusual (and welcome)in
a communications.

For the "unwashed" this is a ham receiver that is more
or less built to mil. specs. No dial cords are used in
the tuning. Only gears. Has bandspread for all the ham
bands between 160 and 10 meters. WARC excluded. The

WARC allocations did not exist at the time of
manufacture. Receiver covers from 540 KHz. to 31.0
MHz.

My tel. is: (478)741-1710 in Macon, GA.

Hi Gang,

Got a bunch of stuff that needs to find a home. Top of the list
is a nice Collins WE 51S-1.
Been gone through, converted KWM-2 cabinet, manual and in nice shape for $1400.
Two Johnson Ranger 1's (possibly a third) for various prices, Hammarlund
cabinets and maybe
some parts. A bunch of oddball stuff as well. In spaces 1728 and
1729. Take this stuff away
and give it a home.

Thanks!!

Letting go of the Excess
Classification

I have a few items for sale if these can be enjoyed by another ham for a while.

RME- 6900 Working fine, really needs to be recapped. $350.00

Collins- R388 No cabinet but has all covers on it for Rack mount.

Cosmetically 6-7 , electrically 10. $500.00

NC-300 Works good, needs the main dial aluminum ring replaced $275.00

NC-303 Was my personal favorite until I was able to get a 75a4. Dial Chord broken. $350.00

Johnson Challenger This rig was restored by Dave in CA for a ER article, Rig works great. The Cabinet is wrinkle Green. Dave's color. $130.00

Globe Chief Deluxe (CW rig) $60.00

Globe King 500c This rig belonged to Ms. Ella Koontz from El Campo, TX The cabinet has been power coated to match factory color and finish. The face plates need to be refinished. It sat out in a small barn near the coast for several years and the salt air played havoc with the face plates, Rig works needs a Filter cap as there is a slight hum in the rig. $900.00

Contact me off the list if interested in any of the rigs.

Thanks,

Serviced a Russian domestic short wave radio yesterday. All the tubes were CCCP tubes. Very Cool! dated 9/71. I went on Google early and got some pretty good cross reference lists. The radio works excellent. Even has a motor driven tuner, that needs a little TLC.
Problem is, tubes that cross to 6BA6's show Short in the tube tester. The Russian equivalent is a 6K4n note the n should be full size lower case n in Cyrillic.

Does anyone have better cross reference data, to
Russian tubes, or have experience with these tubes?
    Also, couldn't find a cross to a 6H2n which shows
a cross reference to a 6CC41, I have no idea what
that is!!!   sincerely   John!

John,

The exact, interchangeable equivalent of the 6K2P (transliterated from
Cyrillic) is the 6BA6.
The 6N2P is equivalent to the Tesla 6CC41 (Czech manufactured), which is a
12AX7/ECC83 without the 12 V filament connection - it's only for 6.3 V.

Hope this helps,

Meir WF2U
Landrum, SC

For those of you not going to Dayton:
Here's some rigs to consider!

B&W 5100B - Nice AM rig. Built like a
battleship with manual $550 shipped.
Central Elctronics 200V - works - has 50-70
watts out, comes with spare finals.
  $650 including shipping.
Galaxy V mk II with supply - works fine
$175 plus shipping, clean.
Collins 516F-2 power supply - winged emblem

$275 plus shipping on this one.

Anybody have one or know someone who does? If so, I have a freebie for
them. It's no big deal so don't get too excited.

I would like to buy an original M.C. Jones Electronics Micro Match MM1 in
good to excellent condition. Will consider fair examples or even a well
done homebrew version as described in April 1947 QST.

Thanks for reading.
